

LIGHT UP THE SKY

Written by Meagan Maria Devauld copyright 2014

V: If you feel alone tonight come walk with me
we'll talk about life and love and how
together we are stronger than one could ever be
but only if you believe

Somewhere there's a paradise waiting for you
just look inside and you'll find that
all you ever needed was to have a little more faith
surrender, don't be afraid

CH: If you want to be free my love just come with me
and we'll light up the sky
keep moving on until we find a harmony
just you and I

INST:

VS: So you want to change your life here tonight
we'll sing the stars a song that will
echo through the tides of ever lasting love
and bring us a new dawn

CH: If you want to be free my love just come with me
and we'll light up the sky
keep moving on until we find a harmony
just you and I

CORO; So you say you wanna be, wanna be
You wanna be free my love now
So you say you wanna be, wanna be
So free now

So you say you wanna be, wanna be
You wanna be free my love now
So you say you wanna be, wanna be
So free now

CH: You want to be free my love just come with me
and we'll light up the sky
Keep moving on until we find a harmony
just you and I

You want to be free my love just come with me
and we'll light up the sky
Keep moving on until we find a harmony

just you and I
